RATHBONES ASSET MANAGEMENT

Rathbone SICAV Multi Asset Strategic Growth

L GBP INC
30 September 2026

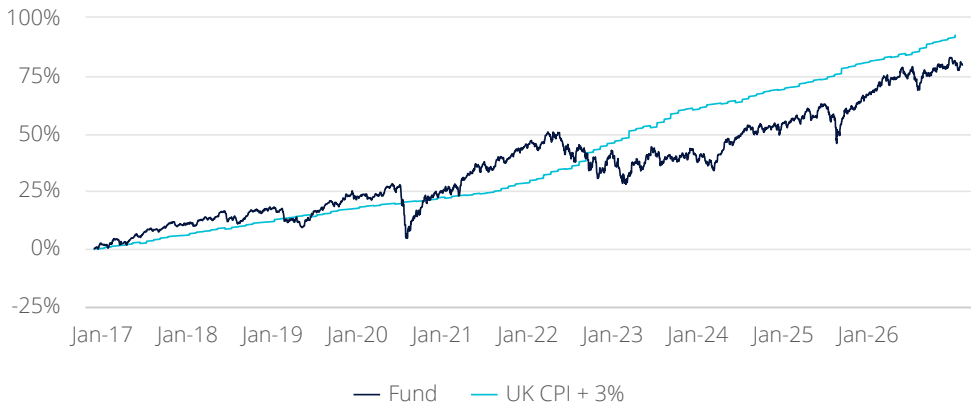

Risk target

66.67% of the FTSE Developed stock market index volatility.

Investment Objective

The sub-fund's objective is to deliver a greater total return than the Consumer Price Index (CPI) measure of inflation +3%, after fees, over any rolling five-year period by investing with the Liquidity, Equity-type risk and Diversifiers assets (LED) framework developed by the investment manager.
The sub-fund aims to deliver this return with no more than two-thirds of the volatility of the FTSE Developed Market Index. There is no guarantee that the sub-fund will achieve a positive return over this, or any other, period and you may not get back the original amount you invested. The sub-fund is classified as an Article 6 financial product under SFDR.

Fund performance Since inception

Important Information

Copies of the Prospectus, the Key Information Document (KID), the Key Investor Information Document (KIID), the Supplementary Information Document (SID), and application forms may be obtained, free of charge, from Rathbones Asset Management Limited.

Strategy AUM is composed of the AUM of funds that share an investment strategy and similar regulatory constraints and are managed by the same fund management team. Where the funds are denominated in different currencies these have been converted into the share class currency of this factsheet as at month end using the European Central Bank exchange rate.

Investors should carefully read the Key Investor Information Document (KIID), Supplementary Information Document (SID) and Prospectus for detailed investor risks and before making an investment decision.

The value of investments and the income from them may go down as well as up and you may not get back your original investment.

If you have doubts about your tax position, or the suitability of this investment, you should seek professional advice.

Important Notes

If you require clarity on any of the terms used in this factsheet then please refer to our Supplementary Information Document for further explanation.

Rathbone Multi-Asset Strategic Growth Portfolio Benchmark: Our benchmarks are calculated on the rate of change of the UK Consumer Price Inflation index, over different time periods (e.g. if we were calculating year to date figures in January 2013, we would look at the percentage change from December 2012 to the end of January 2013). So we take UK Consumer Price Inflation to the current value, and add on the 3% prorated over a year (roughly 0.25% per month). If the UK Consumer Price Inflation Index benchmark were to fall, more than the amount pro-rata, the benchmark year-to-date will be negative, even though inflation as reported by the media (calculated specifically as a 12M rate of change), remains positive.

The OCF includes the charges for the underlying funds held in the product. From April 2018, the ongoing charges figure has been calculated according to PRIIPs regulations, which came into effect on 1 January 2018. Holdings are based on six monthly audited accounts. Changes to fund holdings within this period may result in higher or lower ongoing charges. The OCF is included in the Annual or Interim report and are calculated biannually. The OCF is estimated to reflect the expected ongoing expenses.

Please see the Key Information Document (KID) and/or the Key Investor Information Document (KIID) for details of initial charge of the individual share classes.

Mid market value.
